

## VIDEO-LESSON

### **Title**

Possibilities of Offshore Drilling in Croatia

### **Expert**

Dr Zdenko Kristafor

### **Abstract**

Offshore activities around the world are regulated by a number of international conventions and local legislations. In this web seminar, offshore drilling options and sequential step-by-step construction and assembling of production platforms with production systems installed for shallower and deep sea are discussed. A contemporary exploration overview of the Croatian Adriatic is presented where the public tender for the concessions for offshore exploration is recently announced. Worldwide achievements in offshore drilling are also displayed.
