

## LECTURE

### **Title**

The Sustainocene: era of personalized energy

### **Expert**

Prof Daniel Nocera

### **Abstract**

A new epoch, characterized by ecological, environmental integrity and economic balance might be possible through a decentralized carbon-neutral energy system. Daniel Nocera describes his incredible discovery: how to emulate photosynthesis, to store energy in water splitting and meet future global energy needs.

What is TEDx? In the spirit of ideas worth spreading, TEDx is a program of local, self-organized events that bring people together to share a TED-like experience. At a TEDx event, TEDTalks video and live speakers combine to spark deep discussion and connection in a small group. These local, self-organized events are branded TEDx, where x = independently organized TED event. The TEDx Program is designed to help communities, organizations and individuals to spark conversation and connection through local TED-like experiences.
