

## WEB SEMINAR ENERGY

### **ROBERTO FUSCO**

*Team Leader at eni*

He graduated in Chemistry in 1977 at the University of Naples with a thesis on theoretical chemistry applied to polymerization catalysis. Fusco joined Istituto Donegani in Novara, now Istituto Eni Donegani, in 1982.

He has been working in different fields spanning from organic synthesis, molecular modeling, polymer physics, polymerization catalysis and photoactive materials. As Photoactive Materials Project Manager, his activity is mainly devoted to the development of new materials for Luminescent Solar Concentrators, optical devices aimed to increase the efficiency of solar cells and to reduce the cost of photovoltaic energy. As Eni P.I., Fusco is supervisor of two Eni/MIT joined projects on the design of new materials for solar energy capture and storage.
